

UNDERWATER THREAT ANALYSIS REPORT

AI-Based Maritime Security System | DRDO Project 25243

Timestamp:	2026-06-20 07:18:21 UTC	Location:	Indian Ocean
Operator ID:	OPR-001	Alert Level:	MEDIUM
Total Detections:	1	Anomalies Logged:	2

ANALYSIS SUMMARY

■ SUSPICIOUS ACTIVITY — Flag for operator review

IMAGE ANALYSIS

Original Image

Enhanced Image

Detection Overlay

QUALITY METRICS

Metric	Before Enhancement	After Enhancement	Improvement
UIQM (primary)	1.0	1.0	0.0
UCIQE	0.2819	0.5234	0.2415
PSNR (dB)	—	None	—
SSIM	—	None	—

PSNR/SSIM unavailable — no clean reference image. UIQM/UCIQE are primary metrics for real-world footage.

DETECTION RESULTS

Detection #1: Unidentified Object			
Confidence:	53%	Threat:	MEDIUM
Description:	Object could not be classified with available data.		
Action:	Manual operator review required		

UNCONFIRMED ANOMALIES (2 logged)

- kite — Confidence: 33% (threshold: 50%) — Possible kite detected but confidence (33%) below threshold (50%). Logged as unconfirmed anomaly.
- kite — Confidence: 32% (threshold: 50%) — Possible kite detected but confidence (32%) below threshold (50%). Logged as unconfirmed anomaly.

IMPORTANT DISCLAIMER

This system provides AI-assisted analysis only. All HIGH/CRITICAL detections require human operator confirmation. Country identification is inference-based from visual features only — NOT confirmed intelligence. Do not take autonomous action based on this system alone.
